

PRODUCT SAFETY DATA SHEET

Product: medical mask, 3-ply

Type: disposable, II R

Reference number: Medical Face Mask 2R/SANI-DM-01

Filtration efficiency BFE : ≥ 98 %

Composition:

Nonwovens		
First ply	composition	100% polipropylene
	color	blue
	surface weight	25 g/m2
Second ply	composition	100% polipropylene
	color	white
	surface weight	25 g/m2
Third ply	composition	100% polipropylene
	color	white
	surface weight	25 g/m2
Flexible nose support		
Composition	Polypropylene coated steel/aluminium wire	
Length	85- 95 mm	
Elastic ear loops		
Composition	Polipropylene +elastane	
Color	white	
Extensibility, length	205-300%, 170 - 200 mm	

Storage method: Temperature: -30°C – +70°C ; Relative humidity < 80%

Storage time: 2 years in the original packaging under storage conditions

Disposal considerations: unsorted waste

Utilization:

Medical staff: doctors, nurses, paramedics while performing various types of medical activities, etc. The medical mask can also be used in laboratories, beauty salons, hairdressers or tattoos during some treatments, also recommended for nail styling with a hybrid method. Can be used during cleaning to avoid inhaling dust or detergents. Recommended for doctors, nurses and visitors to infectious diseases wards. The mask with an elastic band perfectly adapts to the curves of the face, thanks to the use of a thin wire that allows any formation around the nose. If the fit is too loose, it is allowed to cross the ear loops before putting them on the ears. The medical mask allows you to breathe freely because the resistance it produces is low. Application in the prevention of infections during medical procedures and, for example, by people who, in the face of their own illness, e.g. colds, viral infections, protect third parties in this way.

Characteristic:

- a product of wide application, both specialist - medical, cosmetic and private
- the ability to perfectly match the mask to the face
- comfortable ear loops
- the mask allows you to breathe freely
- made of pressed non-woven fabric
- Universal size
- fray-resistant material
- a non-sterile product

F/ 46/01
- disposable mask

A medical product compliant with the EN: 14683: 2019 standard, submitted to the Office for Registration of Medicinal Products and Biocidal Products.

Our product has European Intertek tests and CE declarations of conformity according with the medical devices directive MDR 2017/745.

All data contained in this Safety Data Sheet is based on the present state of our knowledge. The card was developed on the basis of data obtained from the manufacturers of individual components.
